

Rob McKinney

Consultant & Professional Speaker, JBKnowledge

 @ConAppGuru

Biography

Over the past decade, Rob has managed safety, quality and training programs with a focus on mobile applications and device usage on construction project sites

Rob McKinney, a self taught construction technologist, first developed a love for technology with his first Atari game machine. He began his career in construction as the Safety Director for J.M. Wilkerson, a construction general contractor based in Marietta, Georgia. Rob furthered his construction and risk management experience at companies like New South Construction and XL Catlin Insurance.

Rob has developed a mobile device program centered around applications used on tablets and smartphones. The purpose of this program is to research and implement new apps and devices to improve workflows. The end goal of the project is to save field staff time and money by streamlining processes and creating a more collaborative work environment.

Rob is the former Chairman of the Associated General Contractors (AGC) of Georgia Technology Committee and a past member of the Associated General Contractors (AGC) of America IT Forum Steering Committee.

This committee meets regularly to develop quarterly roundtable programs focusing on new apps to use on project sites. Rob also has an online blog dedicated to educating construction industry professionals on new uses for technology integrations on projects.

Rob is now a Consultant for JBKnowledge, a provider of technology solutions for the construction and insurance industries, and the co-host of The ConTechCrew podcast. The company is headquartered in Bryan/College Station, TX with offices in North America and South America.
