

ATLANTA | APRIL 17TH

<p>7:00-7:45am</p>	<p>Breakfast Buffet in the ConTech Showcase</p>
<p>SESSION 1</p> <p>Opening Keynote Your Industry in the News: What's Next for ConTech in Atlanta?</p> <p>7:45-8:50am</p>	<p>Speaker: James Benham & Jeff Sample of The ConTechCrew, Josh Bone of DeWALT, Rob McKinney of Rhumbix</p> <p>Description: The Roadshow kicks off with a discussion of the latest technology tools, innovators and trends impacting Atlanta's construction projects. Learn how technology is influencing workflows and improving job site safety, productivity and reducing costs for contractors in your region.</p>
<p>SESSION 2</p> <p>The Role of Data in a Connected Jobsite</p> <p>9:05-9:55am</p>	<p>Speaker: Josh Bone, DeWALT</p> <p>Description: It's 2019 and it's time to have a grownup conversation about your company's construction data and how to make sure it has a positive impact on your projects in the future. In this presentation, Josh Bone digs into how your project data should be captured, organized and managed to add project value and reduce risk exposure. The plethora of technologies in use means that most companies have more data than they know what to do with – let's discuss what to do with it.</p>
<p>SESSION 3</p> <p>To BIM & Beyond! The Software & Hardware You Need to Start Modeling</p> <p>10:10-11:00am</p>	<p>Speaker: Buck Davis, BIMBOX</p> <p>Description: Explore how technology is introducing builders to data mobility, visualization, access and efficiency on projects. We'll investigate how to get your company started utilizing BIM hardware and software on your current jobsites. Whether your company's hesitation is budget, staffing, ROI or experience, Buck addresses how to overcome your BIM adoption and optimization hurdles. See how other companies, from subs to GCs to owners, are transforming their projects and collaboration through BIM.</p>

<p>11:00-12:00pm</p>	<p>Lunch in the ConTech Showcase</p>
<p>SESSION 4</p> <p>Building a Mad Scientist: Driving New Innovation at Complacent Companies</p> <p>12:00-12:50pm</p>	<p>Speaker: James Benham, The ConTechCrew</p> <p>Description: What does it mean to be a "Mad Scientist"? While the term may conjure images of white lab coats and unkempt hair, James Benham argues a "Mad Scientist" is someone willing to disrupt the status quo and experiment in hopes of breaking down inefficiencies. In this presentation, James challenges contractors to cultivate Mad Scientists within their teams to lead technology research and development efforts. Learn how to create a culture of innovation at your construction company by giving your team the tools and space to creatively solve problems with technology.</p>
<p>SESSION 5</p> <p>Who is your Construction Technologist? What Do They Do?</p> <p>1:05-1:55pm</p>	<p>Speaker: Moderator Rob McKinney with Industry Panelists David Epps of Winter Construction, Carlos Osorio of Mann Mechanical Company & Ryan Pastor of Building Point SouthEast</p> <p>Description: This is not your typical panel of geeks. These professionals know technology, but they also know construction – and combining those two skill sets has put their companies ahead of the competition. The ConAppGuru moderates this session discussing a day in the life of a construction technologist and how your company can have one, too.</p>
<p>SESSION 6</p> <p>“Millennial, Schmillennial”: Overcoming Generational Stereotypes to Affect Change</p> <p>2:10-3:00pm</p>	<p>Speaker: Jeff Sample, The ConTechCrew</p> <p>Description: In this talk, Jeff Sample walks through his first-person experience as a younger employee tasked with rejuvenating an older company's technology, and the hearts and minds he had to influence along the way. In an industry known to question the ROI of new technology, Jeff explains the value of communication, respect and bridging the generational gap to influence your company's technology strategy and effectiveness.</p>
<p>3:00-4:00pm</p>	<p>Happy Hour & Giveaways in the ConTech Showcase</p>
